Prizmatix

Mic-LED-365
High Power Collimated Ultra-Violet LED Light Source for Fluorescence Microscopy
Featuring Prizmatix Modular Design for Multi-Wavelength and Fiberoptic Setup

Introduction

The compact Mic-LED-365, High Power UV LED light source is an effective replacement of Mercury and Xenon lamps in many power demanding applications, such as fluorescence microscopy, photo activation (e.g. uncaging), machine vision and numerous others.

The LED source provides >200 mW of collimated UV power on its output. The LED driver supports CW or pulsed operation.

As a member of the modular OptiBlocks family the Mic-LED-365 can be easily converted to numerous configurations providing outstanding versatility (see Accessories section).

Key Features

- Compatible with Prizmatix modular Microscope-LED Light-Source products family – for Multi-Wavelength, fiberoptic applications and more. See all accessories on page 3.
- Easy connection to Olympus, Nikon, Zeiss or Leica microscopes by direct adaptor connection, Liquid Light Guide or Optical fiber
- Single chip High Brightness UV LED
- TTL external triggering (no mechanical shutter needed)
- Analog input, USB and LabView software (Optional features)
- Easy illumination field adjustment by XY and Focus (collimation)
- Very Stable. Precisely adjustable power
- Passive cooling without fan

Applications

- Fluorescence microscopy and Imaging
- Photolysis of caged compounds (uncaging). See also Prizmatix UHP-T-LED-385.
- FRET, FRAP (fluorescence recovery after photobleaching)
- NADH, Quantum Dots, BFP, DAPI, Fura, Hoechst, excitation

BLCC-02 Benchtop LED Current Controller Specifications

Features
- Constant current or chopping modes
- Precise LED current setting by 10 turn dial
- TTL external trigger input
- Compact and robust enclosure
- Analog Input (optional)
- USB control (optional)
Prizmatix

Digital modulation input | TTL
Connector for TTL input and Analog Input | BNC
Digital modulation frequency | Hz | DC-10000
Rise / Fall time (10% - 90%) | µs | 20
Input Voltage | V | 24
Max Input current | A | 1
Power Adaptor Input | 100-240 VAC, 50-60Hz, 1.5A

Microscope Adaptor
The Mic-LED-365 can be directly connected to standard epi-fluorescence port of Olympus, Nikon, Zeiss or Leica microscope. The user can exchange microscope adaptor easily by simple screwing the adaptor to the Mic-LED-365 head.

Beam Combiner Module
The output beam of Mic-LED-365 can be collinearly combined with additional Mic-LEDs by Dichroic Beam Combiners. The Beam Combiner is connected to the Mic-LED by means of four connection pins.

Light Guide Adaptor and Liquid Light Guide (LLG)
The Light Guide Adaptor can be easily screwed into the Mic-LED-365 converting the Mic-LED into a LLG coupled light source. Prizmatix can supply the LLG or adapt the Light Guide Adaptor to match your light guide.

Fiber Adaptor and Optical Fiber
The Fiber Adaptor can be easily screwed into the Mic-LED-365 converting the Mic-LED into a Fiber Coupled LED light source. Prizmatix can supply a variety of fiber patch cords and custom fiber optic assemblies as well as Fiber Collimator for high NA fibers.

Filter Wheel and Filter Adaptor
The Mic-LED-365 can be connected to a 6 positions Filter wheel or to a filter adaptor to provide additional filtration of LED output spectrum.

Remark: Most accessories can be connected in series to create complex system.
